Tornado B47 Beacons

Redtronic's Tornado B47 beacon is designed to incorporate a sleek and modern design whilst providing the ultimate light output to meet R65 Class II in amber and blue. The Tornado B47 beacon meets IP69K to protect against water and dust and features include CAP168/ICAO approval, multiple flash patterns and a variety of mounting options to meet most vehicle applications. Contributing to the vast features and approvals of the Tornado B47 beacon includes CISPR25 Level 3 and as standard built in auto dim sensor which will automatically reduce output in dark environments whilst still adhering to ECER65. The B47 features ultra-bright latest generation LEDs under an ultra-strong, UV stabilised, fresnel polycarbonate lens offering multiple lens colour options and LED colours. The Tornado B47 is manufactured in the UK.
